

How to create ETH (ether) wallet?

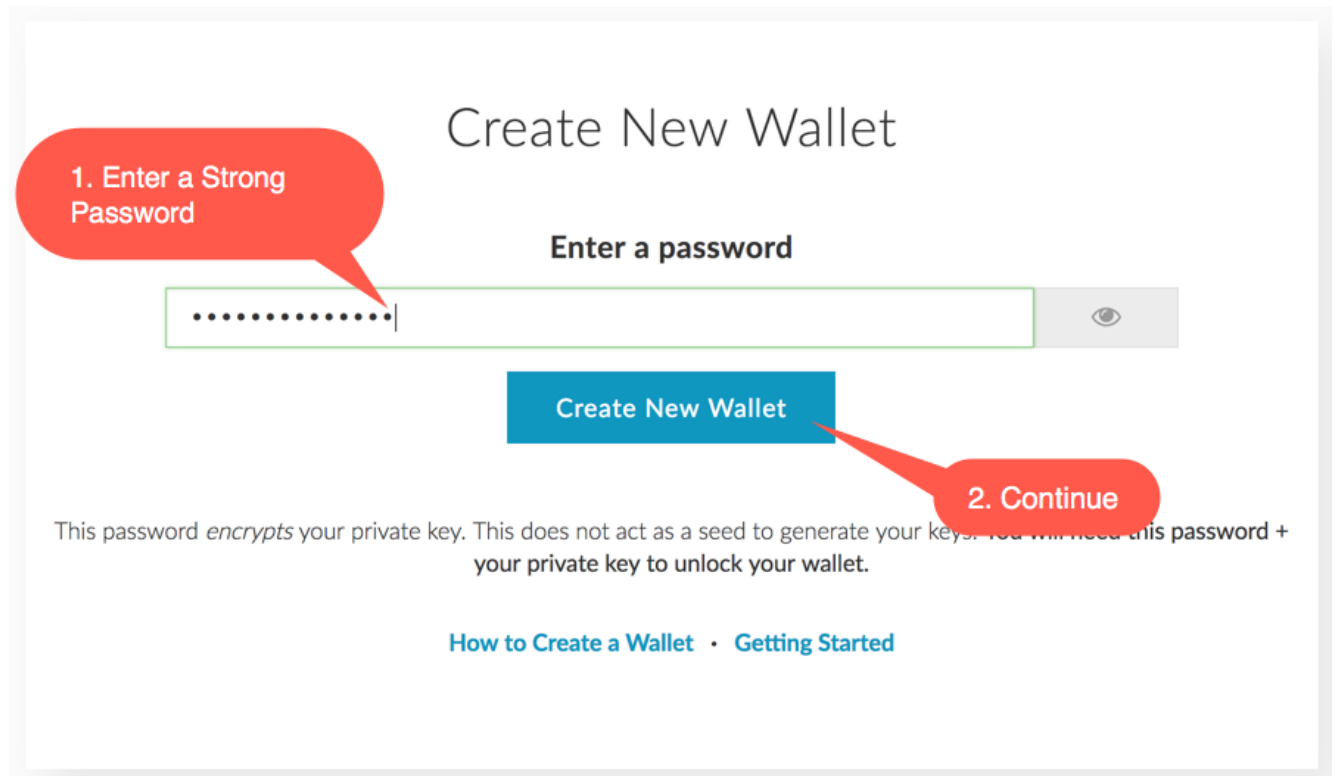

To invest in CREDO (purchase tokens), you need to have the ETH (ether) wallet (even if you already have a bitcoin wallet). You can use the instructions below to create the wallet.

You can add various services to ether wallet such as: [Mist](#), [MyEtherWallet](#), [MetaMask](#), [Parity](#).

We will show you how to join [MyEtherWallet](#) - it is very easy.

Step 1:

Simply visit [MyEtherWallet](#), enter a strong password and, generate a wallet.

The screenshot shows a web form titled "Create New Wallet". At the top, the title "Create New Wallet" is displayed in a large, grey font. Below the title, the instruction "Enter a password" is centered. A text input field contains a series of dots, representing a password. To the right of the input field is a grey button with an eye icon, used for toggling password visibility. Below the input field is a prominent blue button labeled "Create New Wallet". A red speech bubble with the text "1. Enter a Strong Password" points to the input field. Another red speech bubble with the text "2. Continue" points to the "Create New Wallet" button. Below the button, a paragraph of text reads: "This password *encrypts* your private key. This does not act as a seed to generate your key. You will need this password + your private key to unlock your wallet." At the bottom of the form, there is a blue link: "How to Create a Wallet • Getting Started".

Step 2 :

Download the UTC / JSON file with an encrypted version of the private key which is compatible with Geth, Mist, and MyEtherwallet and requires a password to decrypt (Keystore). This file may be useful for restoring you account, so keep it safe.

Save your **Keystore** File.

[Download Keystore File \(UTC / JSON\)](#)

Do not lose it! It cannot be recovered if you lose it.
Your funds will be stolen if you use this file on a malicious/phishing site.
Backup! Secure it like the millions of dollars it may one day be worth.

[I understand. Continue.](#)

1. Download and save your Keystore

2. Continue

Step 3 :

Save your Private Key into your save place and keep it save. Using key combination for PC: "Ctrl + C" and for Mac: "Cmd + C" you will be able to copy your Private Key and to paste it on the next step as well as in your safe place.

The screenshot shows a web interface titled "Save Your Private Key." with a red highlight on the words "Private Key". Below the title is a grey bar containing a long alphanumeric string. A blue button labeled "Print Paper Wallet" is positioned to the right of the string. A red callout bubble on the left contains the text: "1. Copy your Private Key", "PC: Ctrl + C", and "Mac: Cmd + C". Below the button, there are three lines of warning text: "Do not lose it! It cannot be recovered if you lose it.", "Do not use it! Your funds will be stolen if you use this file on a malicious/phishing site.", and "Make a backup! Secure it like the millions of dollars it may one day be worth." At the bottom, a grey button labeled "Save Your Address. →" is shown, with a red callout bubble pointing to it containing the text "2. Continue".

Step 4 :

There are several options for how you can access your wallet. The simplest way is to paste your private key from the previous step, and you will immediately receive your ETH wallet address, with which you can send money and receive tokens.

The screenshot shows the wallet creation interface. On the left, under "How would you like to access your wallet?", the "Private Key" option is selected. A red callout box points to this option with the text "1. Choose 'Private Key' Option". In the center, a text box labeled "Paste/Type Your Private Key" contains a blurred private key. A red callout box points to this text box with the text "2. Paste your private key and click 'Unlock'". On the right, a blue button labeled "Unlock" is visible. Below the main form, there are sections for "Your Address", "Private Key (unencrypted)", and "Print Paper Wallet". A red callout box points to the "Your Address" field with the text "3. Save your wallet address". To the right of the address field, there is a sidebar with "Account Address", "Account Balance", and "Tokens (Ethplorer.io)".

How would you like to access your wallet?

- Metamask / Mist
- Ledger Wallet
- TREZOR
- Digital Bitbox
- Keystore File (UTC / JSON)
- Mnemonic Phrase
- Private Key

How to load ETH wallet with various crypto (bitcoin, litecoin etc.) and fiat (USD, EUR, GBP, RUB etc.) currencies?

The most convenient way to load to your ether wallet is to use cryptocurrency exchanges. You can read below how to use them.

To load ether to your ETH wallet you need to use cryptocurrency exchanges. On the website of these exchanges in the Output field you can choose any currency you need by entering your ETH wallet number that you generated in step 1. In 30 minutes or less you'll get your ether on your wallet.

Here are the most trustworthy exchanges:

Exchange Aggregator: <https://www.bestchange.com>

Fiat currency options (USD, EUR, etc.): <https://www.cryptonator.com/exchange>

Cryptocurrencies (bitcoin, litecoin, etc.): <https://shapeshift.io>

How to send ethers (ETH) to purchase CREDO tokens?

Step 1:

On the MyEtherwallet webpage please click on “Send Ether & Tokens.” Here you can choose the “Private Key” option, paste the key, press Unlock, and you will see fields to send ETH.

Always check the URL and look for MYETHERWALLET LLC [US] Certificate up there. Look for https://www.myetherwallet.com/. Be safe & secure.

Send Ether & Tokens

How would you like to access your wallet?

- Metamask / Mist
- Ledger Wallet
- TREZOR
- Digital Bitbox
- Keystore File (UTC / JSON)
- Mnemonic Phrase
- Private Key

Parity Phrase: [No longer supported](#)

Paste/Type Your Private Key

Unlock your Wallet

Unlock

1. Choose this tab

2. Choose "Private Key"

3. Paste your "Private Key"

4. Click "Unlock"

Step 2:

Then copy our contract number from the page and paste it into the address field.

Address to send ETH: `0x3709b65871f4bCB7EA0742C2a5d34BDdB313eC5b`

Set an amount of ETH you would like to invest. Set the Gas limit as 100,000 – don't worry about the amount because they will return it if not used. Click to generate and click to send.

Then just approve your transaction.

The screenshot shows the MyEtherWallet interface for sending Ether & Tokens. The interface includes a navigation bar with the MyEtherWallet logo, version 3.10.3.9, language (English), gas price (21 Gwei), and network (ETH). The main content area is titled '+ Send Ether & Tokens' and contains the following elements:

- To Address:** A text input field containing the contract address `0x3709b65871f4bCB7EA0742C2a5d34BDdB313eC5b`. A red callout bubble labeled '1. Enter Contract' points to this field.
- Amount to Send:** A text input field with a dropdown menu set to 'ETH'. A red callout bubble labeled '2. Enter an amount of ETH to send' points to this field.
- Gas Limit:** A text input field. A red callout bubble labeled '3. Set Gas Limit as 100000' points to this field.
- Generate Transaction:** A dark blue button. A red callout bubble labeled '4. Click to generate' points to this button.
- Send Transaction:** A blue button. A red callout bubble labeled '5. Click to Send' points to this button.

On the right side of the interface, there is a sidebar with the following sections:

- Account Address:** A red and yellow circular icon and a blurred address.
- Account Balance:** '0 ETH'.
- Transaction History:** 'ETH (https://etherscan.io)' and 'Tokens (Ethplorer.io)'.
- Swap BTC <-> ETH:** A green button with '1 ETH = 0.86935 BTC'.
- Token Balances:** A section with a warning message: 'Alert: There are too many tokens for our poor nodes! Click "Load Token Balances" to see them all. You are limited to loading these once per minute. Try checking your balance on https://etherscan.io or Ethplorer.io instead.' Below this are buttons for 'Load Token Balances', 'Show Tokens', and 'Add Custom Token'.

Step 3:

Check your CREDO token balance on MyEtherWallet

To check the balance of your CREDO tokens is to put this information in the Token Balance:

Address to check your tokens:

0x77557b05ba2b719c5220dfb09fc7f57b2e6deb3f

Symbol: CFD

Decimals: 18

After adding our token, you can check the amount in your wallet.

The screenshot displays the MyEtherWallet interface. On the left, the 'Send Entire Balance' section is visible, with a 'Gas Limit' field set to 21000 and a 'Generate Transaction' button. On the right, the 'Transaction History' section shows links for ETH and Tokens. Below this is a 'Swap BTC <-> ETH' section. The 'Token Balances' section is the focus, featuring a 'Show Tokens' button, an 'Add Custom Token' button, and three input fields: 'Address' (containing the highlighted address 0x77557b05ba2b719c5220dfb09fc7f57b2e6deb3f), 'Token Symbol' (containing CFD), and 'Decimals' (containing 18). A 'Save' button is located below these fields. At the bottom, the 'Equivalent Values' section shows zero values for BTC, USD, CHF, REP, EUR, and GBP.

1. Enter address

2. Enter our token symbol

3. Enter Decimals
